## Field list

Submitted by millionsong on Fri, 01/14/2011 – 14:37

Below are a list of all fields available in the files of the dataset. The same list with data from a specific song is available [here](#). Another reference is the code: [display\\_song.py](#): if a field is displayed, the field exists and there should be a getter for it (if we forgot some in matlab or java, please let us know). For the analysis fields, we suggest you first read The Echo Nest [analyze documentation](#). The main audio features are 'segments\_pitches' and 'segments\_timbre'.

| Field name                  | Type         | Description                              | Link                |
|-----------------------------|--------------|--|---------------------|
| analysis sample rate        | float        | sample rate of the audio used            | <a href="#">url</a> |
| artist 7digitalid           | int          | ID from 7digital.com or –1               | <a href="#">url</a> |
| artist familiarity          | float        | algorithmic estimation                   | <a href="#">url</a> |
| artist hotttnesss           | float        | algorithmic estimation                   | <a href="#">url</a> |
| artist id                   | string       | Echo Nest ID                             | <a href="#">url</a> |
| artist latitude             | float        | latitude                                 |                     |
| artist location             | string       | location name                            |                     |
| artist longitude            | float        | longitude                                |                     |
| artist mbid                 | string       | ID from musicbrainz.org                  | <a href="#">url</a> |
| artist mbtags               | array string | tags from musicbrainz.org                | <a href="#">url</a> |
| artist mbtags count         | array int    | tag counts for musicbrainz tags          | <a href="#">url</a> |
| artist name                 | string       | artist name                              | <a href="#">url</a> |
| artist playmeid             | int          | ID from playme.com, or –1                | <a href="#">url</a> |
| artist terms                | array string | Echo Nest tags                           | <a href="#">url</a> |
| artist terms freq           | array float  | Echo Nest tags freqs                     | <a href="#">url</a> |
| artist terms weight         | array float  | Echo Nest tags weight                    | <a href="#">url</a> |
| audio md5                   | string       | audio hash code                          |                     |
| bars confidence             | array float  | confidence measure                       | <a href="#">url</a> |
| bars start                  | array float  | beginning of bars, usually on a beat     | <a href="#">url</a> |
| beats confidence            | array float  | confidence measure                       | <a href="#">url</a> |
| beats start                 | array float  | result of beat tracking                  | <a href="#">url</a> |
| danceability                | float        | algorithmic estimation                   |                     |
| duration                    | float        | in seconds                               |                     |
| end of fade in              | float        | seconds at the beginning of the song     | <a href="#">url</a> |
| energy                      | float        | energy from listener point of view       |                     |
| key                         | int          | key the song is in                       | <a href="#">url</a> |
| key confidence              | float        | confidence measure                       | <a href="#">url</a> |
| loudness                    | float        | overall loudness in dB                   | <a href="#">url</a> |
| mode                        | int          | major or minor                           | <a href="#">url</a> |
| mode confidence             | float        | confidence measure                       | <a href="#">url</a> |
| release                     | string       | album name                               |                     |
| release 7digitalid          | int          | ID from 7digital.com or –1               | <a href="#">url</a> |
| sections confidence         | array float  | confidence measure                       | <a href="#">url</a> |
| sections start              | array float  | largest grouping in a song, e.g. verse   | <a href="#">url</a> |
| segments confidence         | array float  | confidence measure                       | <a href="#">url</a> |
| segments loudness max       | array float  | max dB value                             | <a href="#">url</a> |
| segments loudness max time  | array float  | time of max dB value, i.e. end of attack | <a href="#">url</a> |
| segments loudness max start | array float  | dB value at onset                        | <a href="#">url</a> |
|                             |              |  |                     |

News

**April 25, 2012**  
The [MSD Challenge](#) has launched!

**October 20, 2011**  
We release the [Last.fm](#) dataset of tags and similarity!

**April 12, 2011**  
We release the [musiXmatch](#) dataset of lyrics!

**March 15, 2011**  
We release the [SecondHandSongs](#) dataset of cover songs!

**February 8, 2011**  
We release the dataset! (and get Dan to [blog](#))
